

ENVIRONMENTAL POLICY
Osceola, AR Manufacturing Plant

CYRO Industries, Osceola Plant, maintains an Environmental Management System to ensure continuous improvement in environmental management and, minimize the environmental impacts associated with the receiving, unloading, storage, process and disposition of chemicals used in the manufacturing of plastic sheet and molding compounds. Particular emphasis will be placed on reducing releases to the environment and reducing waste generation.

Within the framework of our Environmental Management System we commit to:

Identify materials, processes, products and wastes that cause or may cause an environmental impact, and will implement measures to avoid, reduce or control those impacts where technically and economically viable;

Comply with applicable state and federal environmental laws, regulations, codes of practice, and other environmental requirements to which the company subscribes. To achieve and maintain compliance, we will develop and maintain management systems for identifying relevant requirements and for monitoring performance of related activities; and

Continually enhance and improve the Environmental Management System to ensure that it is appropriate and effective for helping us to achieve our environmental goals.
